

Message

I am delighted to offer my sincere congratulations to the whole team and members of the Universal Journal of Pharmaceutical Research (UJPR) on their continued success in the scientific publishing process. This journal publishes original research work that contributes significantly to strengthen the scientific knowledge in multidisciplinary areas in pharmacy and pharmaceutical sciences, such as pharmacology, pharmaceutical chemistry, pharmacognosy, pharmacokinetics and pharmacodynamics of the drugs, general medicine, public health, pharmaceutical marketing, pharmaceutical microbiology, pharmaceutical biochemistry, pharmaceutical education, and hospital pharmacy, clinical trials and other medical practice to increase the impact factor of the journal.

The editorial members who originate from different countries work hard to improve papers' quality and increase the publication frequency. The UJPR managing members are very cooperative, supportive, and responding promptly. The major goal of the UJPR is continual improvement and development in order to meet the highest academic publication requirements, strengthen the reviewer database, and inspire future researchers to contribute to the journal by encouraging the publication of high-quality scientific papers.

The growing up of UJPR is extremely high in a short period; therefore, I expect more success for our journal to be indexed in famous indexing such as Scopus and Thomson Reuters. I welcome my colleagues to submit their manuscripts for publication considerations for forthcoming issues of UJPR.

Finally, I would like to thank all the editorial team members, reviewers, and authors for their support and cooperation. This ranges from the persons who have helped with guidelines, proofreading, and web organizing.

Thanks, with regards.

Dr. Amany Mohamed Alboghdadly 

Department of Clinical Pharmacy and Pharmacology,
Ibn Sina National College of Medical Sciences,
Jeddah, Saudi Arabia
